

"Building Blocks for Integrated Healthcare: Emerging Implications for Community Mental Health"

Integrated healthcare is a trend across the nation as states work to improve the delivery of treatment in both physical and mental health services. The NC Department of Health and Human Services is working towards implementing an integrated healthcare system. This is an opportunity to hear what the Division of Medical Assistance is proposing, how they believe integrated healthcare will work within our state and ask questions or express concerns to legislators. Please join us:

Saturday, April 21, 2018

William & Ida Friday Center
